

## Set up Live TV on your Smart TV

*Note: this only works on LG and Samsung Smart TVs (without Android).*

1. Download the Smart IPTV app on your television
2. Open the app
3. Go to [www.siptv.eu/mylist](http://www.siptv.eu/mylist) (see below)

The screenshot shows the 'Add external playlist links (URI.s), with auto-update' section. It features a 'MAC:' label followed by an input field containing '00:00:00:00:00'. To the right is a 'Link:' label followed by an input field containing 'https://telly/MOORBEELD'. Below the link field is a green plus button. To the right of the link field are two dropdown menus: 'Verstuur' (set to 'E-mail') and 'Stuur naar' (set to 'SMS'). A red 'Add Link' button is positioned to the right of these dropdowns. Below this section is the 'Reset playlist' section, which includes a 'MAC:' label followed by an input field containing '00:aa:bb:cc:dd:11' and a red 'Reset' button. To the right of the 'Reset' button is a CAPTCHA box with the text 'ik ben geen robot' and a blue circular refresh icon.

4. Under MAC: enter the MAC address indicated by the app on your television.
5. At Link: enter the exact code (starting with <http://watchiptv.eu.streamtv>....) As you received it from us by email
6. Click on the "I am not a robot" box
7. Press on "Add link"
8. Close the app or switch your TV off and then on again.

If you open the app now, all channels will be loaded.

Note that the app is free for a number of days, after which you must pay € 5.49 once to the creator of the app to be able to use the app for life (not of course the channels).

After 7 days you have to activate the app once via [www.siptv.eu/activation](http://www.siptv.eu/activation) via the MAC address of your TV for € 5.49 via paypal or credit card. After this has been done you must repeat the above steps from step 3. Do you not have a credit card or paypal? Then we can also activate the app for € 8.49.

**We wish you lots of viewing pleasure!**
